

Anti-Graffiti Paint

Trade Name ASTRO ANTI-GRAFFITI PAINT

ANTI GRAFFITI

ANTI FLY POSTING

MATT OR GLOSS FINISH

Description

A unique one-pack external coating designed to give effective protection against both graffiti and fly-poster attack. Astro Anti Graffiti Paint is a permanent not sacrificial system, allowing for repeated easy removal of any graffiti.

Available in matt or gloss finish and has been specifically designed to minimise any alteration to the appearance of the protected surface.

Astro Anti Graffiti Paint is suitable for a wide variety of surfaces. The matt version is particularly effective on the normally difficult to protect substrates such as rough brick or textured finishes.

The system can be used on concrete, render, masonry, porous stone, timber and previously painted surfaces, it should not however be used over Pliolite based products. To test the suitability of Astro Anti Graffiti Paint we recommend a small trial application be carried out or contact Astroflame for advice.

Available in 5 or 20 litre tins.

To remove existing graffiti from surfaces see our

Application

Stir contents thoroughly before application.

Apply by brush roller or spray. If spraying take care not to contaminate surrounding property. Thin with up to 10% white spirit if needed.

Apply a minimum of two coats at the suggested spread rate to achieve optimum results.

For further advice contact Astroflame.

Typical Properties

- Appearance Semi-transparent/Clear Liquid
- Solvent White Spirit
- Viscosity 2.5 to 3 Poise
- Solids 34 to 36 % by Weight
- Specific Gravity 0.85 to 0.88
- Shelf Life 12 months in unopened container
- UV Resistance Excellent
